

ANU SHRI J

Computer Science Undergraduate | Java | Full-Stack Development

+91 9003534257 | kjothi494@gmail.com | LinkedIn: linkedin.com/in/anushri-dev07 | github.com/anushri-dev07

SUMMARY

Computer Science undergraduate with strong foundations in Java, Data Structures & Algorithms, Object-Oriented Programming and Database Management Systems. Developed full-stack applications using modern web technologies, REST APIs and databases through academic and personal projects. Passionate about developing practical software solutions, continuously learning new technologies and applying problem-solving skills to real-world challenges.

EDUCATION

Sri Shakthi Institute of Engineering & Technology, Coimbatore, Tamil Nadu
B.E Computer Science and Engineering | 2024-2028 | CGPA: 8.4

PROJECTS

SkillRoute — Career Planning & Skill Development Platform | React.js, Node.js, Express.js, MongoDB, JWT

- Developed a career guidance platform that helps students discover career paths, identify skill gaps, and follow personalized learning roadmaps based on their interests and goals.
- Implemented secure JWT-based authentication, role-based access, and progress tracking, enabling users to manage profiles and monitor learning milestones.
- Designed RESTful APIs and MongoDB data models for user management, career recommendations, and learning resource organization.

Virtual Travel Planner — React.js, Node.js, Express.js, MongoDB, Google Maps API, Weather API

- Built a travel planning application that generates personalized itineraries based on destination, budget, travel dates and user preferences.
- Integrated Google Maps and Weather APIs to display routes, nearby attractions, and real-time weather information for planned trips.
- Developed RESTful APIs and MongoDB data models to manage itineraries, destination details and trip history through an intuitive user interface.

TruthLens – AI Multimedia Authenticity Checker — React.js, Node.js, Express.js, MongoDB, Gemini API

- Developed a web application that analyzes uploaded images, videos, audio and documents to identify AI-generated or manipulated content using AI detection services.
- Integrated external AI APIs to generate authenticity reports with confidence scores and detailed insights across multiple media formats.
- Implemented secure authentication, file upload management and report history using RESTful APIs and MongoDB.

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL, C, HTML, CSS

Frontend: React.js, HTML5, CSS3, Bootstrap

Backend: Node.js, Express.js, REST APIs

Database: MongoDB, MySQL, Mongoose

Authentication & APIs: JWT, bcrypt, Gemini API Integration

Tools: Git, GitHub, Postman, VS Code

Core CS: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks

PUBLICATIONS & CERTIFICATIONS

- Publication: **AI-Based URL Notifier System** – Journal of Technologies (JOT), 2025 (Scopus indexed),
Event Management System – Journal of Technologies (JOT), Scopus Indexed, 2025
- Certifications: Java Programming Fundamentals – Coursera & Board Infinity, AI for Beginners – HP LIFE, Power BI (Intermediate) – Coursera & Board Infinity, JavaScript Fundamentals – Udemy, Introduction to AI – Google.
